

## **BLOOMFRAME® RENOVATION**

description	Transformation industrial building into apartments
program	8 apartments of 125-250m <sup>2</sup> with Bloomframe® balcony
location	Weesp, The Netherlands
client	Hurks geveltechniek BV
phase	Preliminary Design
periode	2008
team	Barbara Dujardin, Michiel Hofman, Bart Wigger and Tinka Niemann

For the existing industrial building to be turned into apartments we designed a new façade with the goal to maintain it's peculiar industrial character. This is achieved by providing each of the generous apartments with full transparent Bloomframe® balconies, alternated by large plain windows. The transformation from industry into apartments will therefore only be clearly perceptible when opening the balconies.
