NUNO GONCALVES FERREIRA & ERIN HAYNE

SWAMP COLLECTION

The Swamp Collection creates a rich multi-sensory experience out of seating by fusing thermochromatic material with soft, organic shapes. We have drawn from the swamp's wild and beautiful imagery to create four distinctive pieces of furniture, the Swamp Bench, Swamp Lounge, Duckweed Lounge, and Cypress Stool. Each piece from this collection is an interactive piece of furniture that changes color in response to body heat. A simple touch activates the color changing properties of the material and leaves behind a temporary mark of your body in a rich contrasting color (black to blue or red to violet). After several seconds the piece begins to cool and the mark disappears, revealing the furniture's original color. Each piece is also a visual barometer of a room's ambient temperature. As the heat rises, the black furniture shifts through shades of brown, green, blue, and purple and the red furniture shifts through subtle shades of orange, pink, and violet.

SWAMPCOLLECTION
SWAMP BENCH

SWAMP BENCH

Furniture from the Swamp Collection takes its roots from the sensual forms found deep within the Cypress Swamp. The gentle shape of the Swamp Bench and Swamp Lounge make reference to the soothing silhouettes of lily pads that skim the surface of the swamp's many lagoons.

The Swamp Bench and Swamp Lounge are interactive pieces of furniture that change color in response to body heat. These pieces are one color at room temperature and change to another color when heated. As the pieces cool or the temperature drops, the original color returns. The Swamp Bench and Swamp Lounge come in two color combinations, black changing to blue and red changing to violet. The color changing effect does not wear away with use or degrade with time as it contains thermochromatic crystals that are fully encapsulated into the fabric. However, these pieces are not recommended for permanent outdoor use. The fabric is contract grade polyurethane that is UV stable and anti-bacterial. The interior of the Swamp Bench and Swamp Lounge are made from cut, multi-density foam that is carefully padded to obtain its smooth curves.

Lead time for these pieces is 4 to 6 weeks. The Swamp Bench and Swamp Lounge are extremely light for their size and can be easily shipped to most destinations. Please contact Visual Reference Studio for additional information. Phone: 601.944.0023 | Fax: 601.969.6415 | info@visualreferencestudio.com

SWAMPCOLLECTION
DUCKWEED LOUNGE

DUCKWEED LOUNGE

Duckweed, a tiny aquatic flower that blooms in irregularly shaped clusters, is the inspiration behind this sculptural lounge. The deep, soft curves of this piece invite you to find the perfect groove to fit your body. The asymmetrical, duckweed shape also allows several people to sit comfortably and still find their own niche.

The Duckweed Lounge is an interactive piece of furniture that changes color in response to body heat. This piece is one color at room temperature and changes to another color when heated. As the piece cools or the temperature drops, the original color returns. The Duckweed Lounge comes in two color combinations, black changing to blue and red changing to violet. The color changing effect does not wear away with use or degrade with time as it contains thermochromatic crystals that are fully encapsulated into the fabric. However, this piece is not recommended for permanent outdoor use. The fabric is contract grade polyurethane that is UV Stable and anti-bacterial. The interior of the Duckweed lounge is made from cut, multi-density foam that is carefully padded to obtain its smooth curves.

Lead time for this piece is 4 to 6 weeks. The Duckweed Lounge is extremely light for it's size and can be easily shipped to most destinations. Please contact Visual Reference Studio for additional information.

SWAMPCOLLECTION
CYPRESS STOOL

CYPRESS STOOL

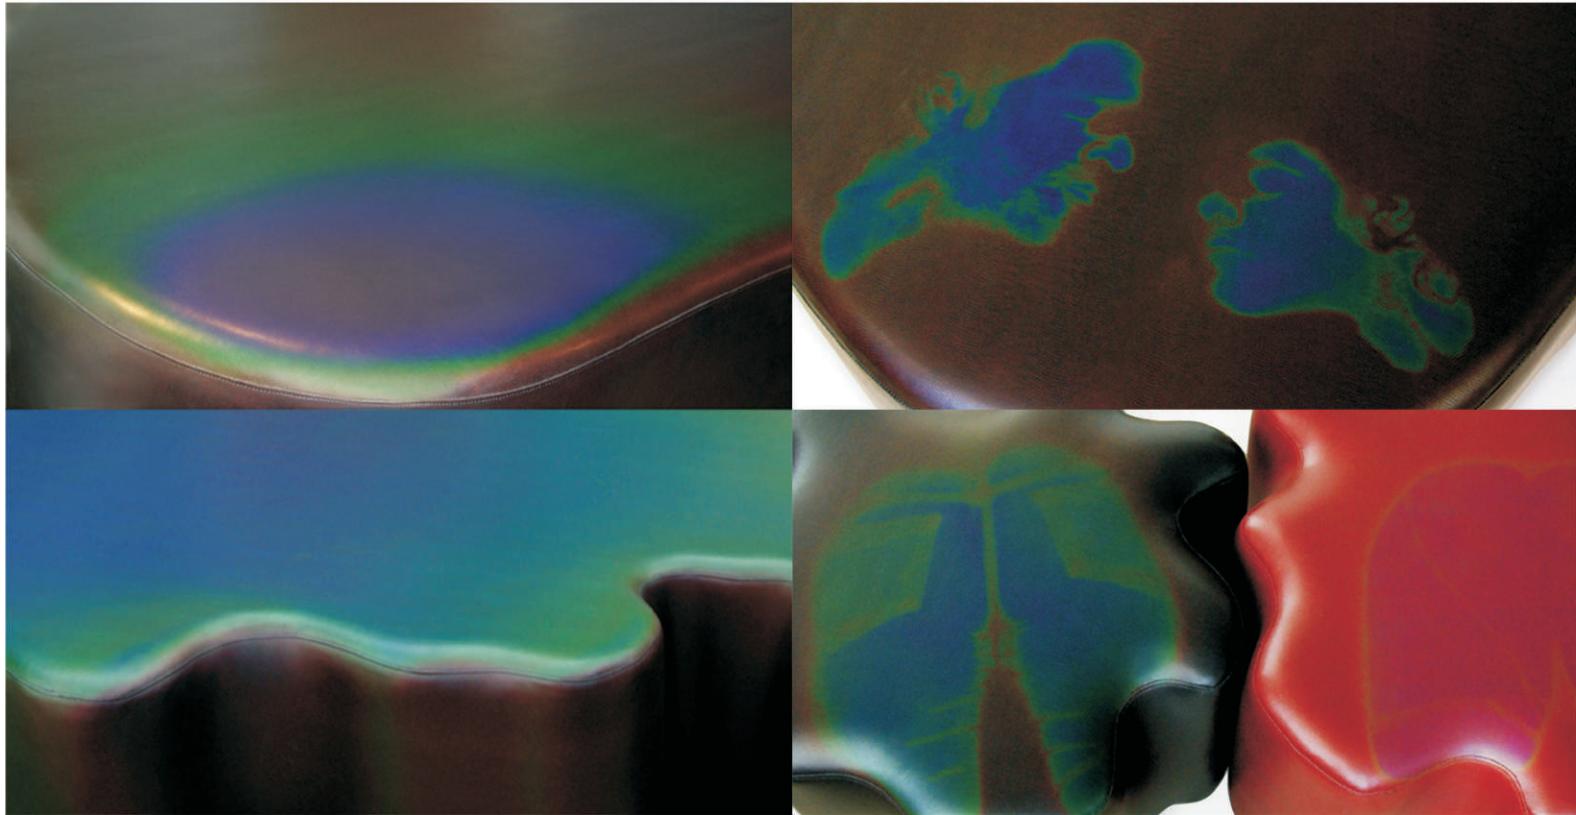

The cypress tree, an enigmatic icon of the swamp, is the inspiration behind this contemporary stool. The piece's gentle, snaking contours invite you to nestle your body into its shape and discover your own, personal, sweet spot.

The Cypress Stool is an interactive piece of furniture that changes color in response to body heat. The stool is one color at room temperature and changes to another color when heated. As the piece cools or the temperature drops, the original color returns. The Cypress Stool comes in two color combinations, black changing to blue and red changing to violet. The color changing effect does not wear away with use or degrade with time as it contains thermochromatic crystals that are fully encapsulated into the fabric. However, this piece is not recommended for permanent outdoor use. The fabric is contract grade polyurethane that is UV stable and anti-bacterial. The stool's interior is made from cut, multi-density foam that is carefully padded to obtain its smooth curves.

Lead time for this piece is 4 to 6 weeks. The Cypress Stool is extremely light and can be easily shipped to most destinations.. Please contact Visual Reference Studio for additional information.
